

## CLAIMS

1. A pimple removal utensil (100) comprising:  
a holder (101); and  
5 a pressing portion (106) having a first extension (110) and a second extension (120) which correspond to each other and are branched off and extended from the holder (101), and a pimple insertion hole (114) formed inward the first and second extensions (110, 120).
- 10 2. The pimple removal utensil of claim 1, wherein a number of indents including a number of grooves (112, 121) and a number of protrusions (111, 122) are formed on the inner contacting surfaces of the first and second extensions (110, 120), in a corresponding unevenness shape.
- 15 3. The pimple removal utensil of claim 1 or 2, wherein the bottom of the pressing portion (106) is formed of a convex curved surface.
4. The pimple removal utensil of claim 1 or 2, wherein the interval between the first and second extensions (110, 120) becomes narrow gradually as it reaches  
20 from the insertion hole (114) to the end.
5. The pimple removal utensil of claim 1, further comprising an auxiliary grip (103) formed in the perpendicular direction from the holder (101).
- 25 6. The pimple removal utensil of claim 1, further comprising a ball-shaped massage ball (108) formed on the upper portion of the holder (101).
